SKILLS

High level interpersonal, verbal and communication skills

I have worked with classmates and colleagues with widely ranging academic backgrounds to achieve common goals and targets

Past collaborations in multi-disciplinary teams have led me to an appreciation of the art of communication and planning

Able to adapt communication skills to better suite the intricate characteristics of the target audience and colleagues, be they due to diverse cultural background, varying cognitive skills, or other factors

Able to clearly and concisely record information, adhering to professional guidelines and standards

Ability to solve problems and innovate

Within team and solo environments, I ensure that milestones and draft copies of final reports are produced, such that revisions can be made within timely manners

I ensured that high attention to detail can be afforded by having plenty of time before deadlines

For case competitions, I always strive to approach difficult problems from multiple perspectives

I make effective use of my knowledge of R, EXCEL, and STATA to optimise my workload efficiency

I isolate problematic coding chunks by methodically evaluating which stage of the execution the code arises from

Demonstrated leadership skills

I make sure to play my part, and often more, such that the final result for any purpose is of stellar quality

I often assist colleagues in how problems could be addressed or responded to, making use of my in depth actuarial and econometric skillsets

Language Skills

Bilingual, proficient in English and Mandarin
