Dear Hiring Manager,

I am writing to express my interest in this internship position. Currently, I am pursuing a dual degree in Actuarial Studies and Economics at UNSW, and I have consistently achieved a High Distinction average in my coursework, with a WAM of 88.00.

I have completed all first, second and third year actuarial courses regarding the path to become an Actuarial Fellow. These courses have equipped me with knowledge in domains such as Machine Learning, General Insurance, Asset – Liability Management, Financial Derivatives, Life Mortality Modelling, Life Insurance and Superannuation, Deep Learning and Quantitative Risk Management.

My academic background in finance, economics, and actuarial science, combined with my technical skills, equips me with a strong foundation to excel in this role. I have maintained a WAM of 88.00 while actively participating in various actuarial case competitions. These competitions have ranged from pension modelling to analysing large coastal image datasets using deep learning techniques, showcasing my ability to perform under pressure and deliver high-quality results.

I possess a strong ability to code in R, Python, STATA and Excel, with additional skills in data visualisation skills in programs such as Tableau and Power BI.

I am confident that my strong skill sets in actuarial science and economics will enable me to make meaningful contributions. I am eager to apply my knowledge and skills in a practical setting and to further develop my expertise through this internship opportunity.

Thank you for considering my application.

Regards,  
Cymon
